

## § 1470.22

comply with the contract due to circumstances beyond the control of the participant, including a disaster or related condition, as determined by the State Conservationist; and

(7) Include such other provisions as NRCS determines necessary to ensure the purposes of the program are achieved.

### § 1470.22 Conservation stewardship plan.

(a) NRCS will use the conservation planning process as outlined in the NPPH to encourage participants to address resource concerns in a comprehensive manner.

(b) The conservation stewardship plan will contain a record of the participant's decisions that describes the schedule of conservation activities to be implemented, managed, or improved under the conservation stewardship contract.

(c) Associated supporting information maintained with the participant's plan will include:

(1) CMT documentation that will be the basis for:

(i) Identifying and inventorying resource concerns,

(ii) Establishing benchmark data on the condition of existing conservation activities, and

(iii) Documenting the participant's conservation objectives to reach and exceed stewardship thresholds;

(2) A plan map delineating enrolled land with associated acreage amounts;

(3) In the case where a participant wishes to initiate or retain organic certification, documentation that will support the participant's transition to or participation in the National Organic Program;

(4) In the case where a participant is approved for the on-farm research and demonstration or pilot testing option, a research, demonstration, or pilot testing plan consistent with design protocols and application procedures established by NRCS; and

(5) Other information as determined appropriate by NRCS.

### § 1470.23 Conservation activity operation and maintenance.

The participant will maintain and manage existing conservation activi-

ties on the agricultural operation to at least the level of conservation performance identified at the time the application is obligated into a contract for the conservation stewardship contract period, and additional activities installed and adopted over the term of the conservation stewardship contract.

### § 1470.24 Payments.

(a) *Annual payments.* Subject to the availability of funds, NRCS will provide, as appropriate, annual payments under the program to compensate a participant for installing and adopting additional conservation activities, and improving, maintaining, and managing existing conservation activities. A split-rate annual payment structure will be used to provide separate payments for additional and existing conservation activities in order to place emphasis on implementing additional conservation.

(1) To receive annual payments, a participant must:

(i) Install and adopt additional conservation activities as scheduled in the conservation stewardship plan. At least one additional enhancement must be scheduled, installed, and adopted in the first fiscal year of the contract. All enhancements must be scheduled, installed, and adopted by the end of the third fiscal year of the contract, and

(ii) As a minimum, maintain existing activities to the level of existing conservation performance identified at the time the application is obligated into a contract for the conservation stewardship contract period;

(2) To earn annual payments for an eligible land use, a participant must schedule, install, and adopt at least one additional conservation activity on that land-use type. Eligible land-use types that fail to have at least one additional conservation activity scheduled, installed, and adopted will not receive annual payments;

(3) A participant's annual payments will be determined using the conservation performance estimated by the CMT and computed by land-use type for eligible land earning payments. Conservation performance is prorated
